ACADEMIC PROJECTS

Car Rental Booking System

HTML5

CSS3

JavaScript

PHP

MySQL

- Designed and developed a responsive web-based car rental booking platform with user authentication and access management
- Built vehicle management and booking management functionality backed by MySQL database integration
- Delivered a responsive interface with an enhanced user experience design

Prescription Management System

HTML5

CSS3

JavaScript

PHP

MySQL

- Developed a role-based healthcare management application with doctor authentication and patient login functionality
- Implemented prescription management, appointment scheduling, and patient record management
- Built on a secure MySQL database implementation

EXPERIENCE

Freelance Web Designer & Frontend Developer

Self-Employed

- Designed and developed responsive websites and modern user interfaces for academic and personal projects
- Created professional digital assets including logos, posters, banners, and social media graphics
- Enhanced website functionality and frontend performance using HTML, CSS, JavaScript, PHP, and MySQL technologies

CAREER OBJECTIVE

Seeking an internship or entry-level opportunity as a Software Developer, Web Developer, or IT Support professional where I can apply my technical knowledge, enhance my software engineering capabilities, contribute to impactful projects, and grow within a forward-thinking IT organization.
